PRICE LIST.

FALL 1915. :
SPRING 1916.

SAM STOKES & SON,
Lecompte, Louisiana.

We are specialists in everything we grow.

We begin digging and shipping as early in the fall as the stock is sufficiently matured and continue all winter and spring.

We recommend express shipments as only the small sizes can go by parcels post. Have your orders sent by express and you will get larger plants.

If ordered by mail add about one-fifth to your order and if any remains over we will return it in stamps.

Always give name of your express office and write your name and address plainly.

Now, a few words on transplanting.

The main things for the successful transplanting of trees, shrubs or anything in that line, is to place fine pulverized soil on the roots and give a liberal watering to settle the soil firmly on them. Do not put trash or fertilizer of any kind on the roots. We never use fertilizer in transplanting.

All stock should be planted same depth it grew in the nursery. A large amount of valuable stock is lost by planting too deep. It should be borne in mind that most all the fibrous roots of trees and plants grow in the surface soil. The large roots that run deep down are only to hold the tree up.

Stiff or heavy soil should have sand mixed with it to insure good results.

In making remittance, send check, money order or cash by registered mail. Please do not send stamps.

Do not condemn our stock because we send this cheap price-list. We give full value in strong healthy plants, true to name or color.

We do not care to accept orders for a less amount than one dollar.

We always put in something extra.

Send us your order and I don't think you will regret it. Address

SAM STOKES & SON,

Lecompte, La.

Almond—Flowering, pink; double, blooms in early spring, price 10c.
